

BENDED PROFILES AND CNC SHEET METAL PROCESSING

CNC

The Company CIPI s.r.o. is also manufacturing various bended profiles and is able to offer their assembly on building site. Moreover, CIPI offers CNC sheet metal processing to its business partners on state of the art equipment.

In the field of bended profiles, the company specializes mainly on basements for skylights, RWA devices and air conditioning systems. Extensive experience with deliveries and installation of skylight on the basements from own production helps us to identify and fulfill the needs of our customers.

The basements for roof devices from CIPI s.r.o. are able to fulfill all functional requirements of industrial as well as civil engineering.

In this filed the portfolio of the company consists of:

- Complete basements of various shape and uncoiled length
- Full scope of basement accessories as corner connections, fasteners, cross brace rods, draw rods, anchoring points, U and Z shaped profiles
- Manufacturing lengths of individual pieces up to 8,500 m, material strength from 1 to 4 mm
- High quality galvanized steel sheets DX 51 + Z275 according to EN 10142 and S 320GD + Z275 according to EN 10147
- Surface treatment in all RAL color tones
- Flexible lead times
- Complete custom production according to the needs of our customers
- Assembly of basements and various metal products

CNC

State of the art CNC equipment from renowned manufactures as Trumpf, Safan and Fin power enables us to offer a wide range of sheet metal working services based on the specific needs our customers.

Our company offers the following services in the area of CNC sheet metal working:

- CNC uncoiling and cutting
- CNC press punching and perforation
- CNC bending up to the length of 8500mm
- CNC plasma arc cutting
- CNC laser cutting
- Welding (Steel and Aluminum), Riveting
- Assembly of metal parts
